### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The examiner is withdrawing the previous rejection of Kato in view of Oshima for the subject matter of claims 1+6 (now incorporated into claim 19). In particular, Kato is drawn to determining whether the measured oxygen concentration at an auxiliary measuring electrode 50 is within a prescribed range for the measuring electrode. The measured current proportional to this concentration is supposed to be constant and within the prescribed range because the main pumping means is regulating the oxygen concentration in the gas sensor prior to the exposure of the auxiliary electrode to the oxygen containing gas. See col. 2, ll. 20-34. Because the current measured by this auxiliary electrode is supposed to be independent of the oxygen concentration (i.e. constant irrespective of the gas composition) in a properly operable gas sensor, it would not have been obvious to one of ordinary skill in the art to determine a proportionality factor between the pumping current and the oxygen concentration as there should be no proportionality between the two. Applicant's new claim 19 is thereby free of the prior art. Applicant's arguments concerning Kato are drawn to measuring electrode 172. However, the original rejection was not based on electrode 172 as reading on the measuring electrode of the claim, but rather electrode 50 (see paragraph 3 from the previous office action). Hence, applicant's arguments appear to be moot with respect to what the rejection was actually suggesting.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
